DUAL CREDIT ADVISING FORM

Student _____ CHS ID _____

As noted in the Center High School **DUAL CREDIT HANDBOOK**, there are two tracks a student can follow to receive dual credit: (Refer to the CHS website for information.)

ACADEMIC TRACK: Students begin working towards the completion of the college **CORE CURRICULUM** to further their college education. Some may choose to take the courses needed to complete an Associate Degree.

CAREER AND TECHNICAL TRACK: Students enroll in courses to complete a **CERTIFICATE** or Associate Degree with an emphasis on a career tech area.

Regardless of the track selected, critical questions to ask are:

1. What is my long-term educational goal related to a career area?
2. How does the dual credit course help me reach my goal?

Colleges and universities have degree plans online to assist in course planning. A sample Dual Credit Advising Plan for Core Completion/Associate Degree is attached as a reference /resource.

When enrolling in a dual credit course, the student acknowledges:

- A Course of Study/Major at the college level has specific requirements; these can vary by major area. Note: Math and Science requirements can vary by major.
- The Course of Study/Major may have specific program prerequisites linked to program acceptance.
- It is critical to research degree plans at each college of interest to compare program requirements.
- Dual credit course selection should be linked to Core completion or a program of post-secondary interest.
- Dual credit courses taken may or may not count toward every degree plan; it is important to research major requirements to determine if the course taken is considered a part of the Core Curriculum OR is major specific.
